Col. William Fette, proprietor of tha Harvest Home alleys, out Caldwell's run, intends to give the newspaper boys a whack at his alleys some day next week, the day to be selected by the pencil push, ers. It is unnecessary to state that there will be a hot time on that occasion, and Colonel Fette will be kindly remembered for his generosity.

Mr. Charles Nelbor last night enter-tained a number of his friends at the Fette bowling alleys, and an enjoyable evening was spent in bowling, after which hot refreshments were served. Mr. Niebor has the making of a fine bowler, and no doubt will soon be a member of one of the various clubs of the Wheeling Bowling League.

The Pirates, Tidal Waves and Cosmopolitan teams will practice to-night. The Auroras and The Bowlers will practice to-morrow night.

Yesterday afternoon Mr. J. Coleman and J. Emig, of the South Side, bowled three games on a wager, Mr. Fette win-sing hands down.

Both parties still claim the supremacy but it is stated on good authority that Mr. Elliott will seek means to place him in possession of the building, and if he succeeds he will close it up for church purposes, and go back to Pittsburgh, holding the property until he he gets some of his back salary. The Johnson faction laughs at this threat, and also intimates that there is a scheme on foot to give the Ebenezer congregation possession. The latter is a split from the Macedonia, and since its formation has worshipped in the Second ward market house.

IN THE OIL FIELDS.

WHAT THEY ARE DOING IN THE OIL COUNTRY-SOME FLATTER-ING REPORTS.

The Elk Fork field is still attracting a lot of attention and the southwest ex-tension in the direction of the Hill well is the centre of attraction. The Hill well just now is being watched very closely When this well was first drilled in it started off at a rapid gait, but did not keep it up very long and during last week almost altogether collapsed. The well was reported to-day as making about ninety barrels and the owners intend to shoot it with the hope that it will increase its production. The con-census of opinion is that it has filled up

census of opinion is that it has filled up with sand and that a shot will do it a great deal of good.

Up in the northern part of the Elk Fork field Nichols & Barnsdall has completed their well on the Hawkins farm and will have a very dry hole. Very nice sand was gotten in this well, but there was only a slight showing of the fluid.

The Eastern Oil Company have the The Eastern Oil Company have the rig completed for their No. 2, on the Glenn farm to the east of the original wells on the Woods farm and will commence drilling at once. The rig for No. 3 is building and will be completed in a couple of days.

The Wilson Run territory on the Ohio side back of Sistersville, is not showing up quite as well now as it did last week and the indications are that it will not

and the indications are that it will not

and the indications are that it will not amount to anything.

The territory in the vicinity of Cameron is not nearly so bad as that at Wilson Run, although it is bad enough. The two dry holes furilled in there a couple of days ago has given that stuff a black eye from which it will not recover very rapidly and in the future there will be more caution used by the operators in that section. There is still considerable work being done in the Cameron field and some of the wells will be due in the sand before the week is out. The most important wells now are to the north in the direction of Clarington, and they are being watched very closely. The Mobley well started off at about forty barrels a day, and it is still doing about that amount, while the Camerothers which made boot where wells and the considerance which made boot where wells the considerance where the considerance where the considerance where the considerance is a considerance of the considerance where the considerance is still doing about that amount, while the Considerance is the considerance of the considerance in the considerance is still doing about that amount, while the Considerance is the considerance in the considerance in the considerance is the considerance in the considerance in the considerance is the considerance in the considerance in the considerance is the considerance in the considerance in the considerance in the considerance in the considerance is the considerance in the considerance is the considerance in the considerance i doing about that amount, while the Groadhaus, which made about ninety barrels when drilled in, is now making

barrels when drilled in, is now making about seventy-five barrels a day.

The wild-catter is not doing a great deal of work at present and none of them will until the price of oil goes up considerably. At the price oil is at present, it does not pay them to go into new territory and take a chance of drilling a dry hole and losing several thousand dollars in experimenting. There is a great deal of territory under lease, es. sand dollars in experimenting. There is a great deal of territory under lease, especially in the southern part of the state and if the price of crude petroleum would go up the drill would be bouncing merrily in many new sections. There has perhaps never been a field in the history of the oil business of this state that has produced so much oil in such a short time, nor in which there has been so many good paying proper-

has been so many good paying properties as in the Elk Fork territory in Tyler county, which was opened up just
about one year ago, and it is also a
mooted question whether there has ever
been a field which has attracted the
tenderfeet so well and in which they
have made so much money. Nearly all
of the operations in that section have
been carried on by people who have
never been in the business before, but
there are some who had years of experience, although they are much in the
minority. As an instance of the good
property which has been developed in
that section the Pipes farm, of the Henry & McDonald Company, is a good
criterion. These people have drilled in
even dozen good wells on this farm and
at the present time have about 1,700
barrels of a production.
